React MFES Welcome!

Course Overview

- Understand exactly what an MFE is, the challenges associated with how to structure a React MFE project.
- MFEs allowing multiple teams to work on the same application. Fa change management.
- React user experience, fast, responsive, interactive.
- TypeScript robust code, less likely to have bugs.
- Is there anything else anyone would like to get out of this week?

Day 1 Overview

Agenda

- Introductions
- Technology set up (get everyone on virtual machines)
- JavaScript fundamentals
- JavaScript exercise
- TypeScript fundamentals
- TypeScript exercise
- Modern JS/TS techniques
- Day 1 wrap up VMs, GitHub/BitBucket, EasyRetro.

Aim

Have a good enough knowledge of JavaScript and TypeScript to allow us to mov React.js tomorrow.

Introductions

- What's your name? Let us know how to pronounce it.
- What team/area of the company are you
- What programming languages do you we with / have you worked with before?

How to Interact with the Course

- Feel free to interrupt the instructor at any time by raising a hand. For exa
- If we use terminology that you have not heard before.
- If you haven't understood the instructor's accent.
- There are 2 of us: whoever is not presenting is free to help with any error them over.
- Share your errors.
- We can all be teachers and we can all be learners!
- Phone/email communications silenced during training.

Structure of Each Day

- Teaching will start promptly at 9am. From tomorrow, you are expect in place with your tech ready for the 9am start.
- Lunch 12pm 1pm.
- Afternoon break 2.45pm
- Additional breaks at flexible times
- If you need a restroom break you can leave and return no need to

How Experienced are You with the Followi

- HTML & CSS
- JavaScript
- TypeScript
- React.js

- Advanced "When I sleep, I dream in this language"
- Intermediate "I have experience but wouldn't call myself an expert
- Beginner "I'm here to learn more about this technology!"
